What additional knowledge and experience would make me a great candidate?

- Experience with consulting-model employment
- Completion of 40-hour OSHA Hazmat training (required within first month of employment)

What kind of work would I be doing?

The Environmental Tech will be responsible for the completion of a variety of basic environmental, geologic, engineering, and field and office tasks. Environmental Tech-related field tasks will include the collection of stormwater samples, groundwater samples, soil samples, soil-gas samples, and field environmental reviews and construction- and industrial-site inspections to verify contractor compliance with various regulatory requirements. Geology-related field tasks may include mapping, testing, and sampling with both drilling and excavation equipment.

The Environmental Tech will assist in the completion of inspection reports, well reports, collection and assessment of analytical lab data, the interpretation of geologic and geotechnical data, and the preparation of geologic reports and maps. It is expected that this person will continually understand and act consistently with the values and culture of SHN.

To Apply

Please send to SHN-Hire@shn-engr.com a cover letter that addresses your interest and experience along with your resume. All inquiries will remain confidential.
